## 1. DESCRIPTION

### 1.1. Purpose

The purpose of this report is to estimate the total population, by state, from 1789 to 2000. As explained in Section 2, the *census population* data (from which this report is drawn) should not be confused with *apportionment population*.

Projected population data, from 2001 to 2100, is provided in a separate TTO report.<sup>1</sup>

### 1.2. Data Source

The data in this report was developed from the census population data provided by the United States Census Bureau (“USCB”).<sup>2</sup>

For time periods that *preceded* the USCB census data, supplemental sources were used to estimate the pre-censal data. These data sources are identified in Appendix 2, Note 3.

### 1.3. Methodology

Using the USCB’s decennial census data, the population estimates for the intervening years were calculated for this report through mathematical interpolation. This interpolation was done for each state. The *aggregate* interdecennial projections were then calculated by summing the states’ values.

Appendix 1 provides a detailed description of the interpolation method used for this analysis.

---

<sup>1</sup> The previous edition of this report included post 2000 projections. Because they are likely to change over time, those projections have been published in a separate TTO report available at <http://www.thirty-thousand.org/pages/QHA-01.htm>.

<sup>2</sup> Historical data is available from the USCB at <http://www.census.gov/population/www/cen2000/respop.html>

## 2. CENSUS VS. APPORTIONMENT POPULATION

Users of this data should understand the distinction between *census population* and *apportionment population*. The census population is simply the number of inhabitants residing within the United States. The apportionment population is used to *apportion* representation. Since 1870, these two values have been nearly (if not completely) equal to one another.

The two data sets are compared in the table below.

Census		Census Population (USCB)	Apportionment Population (Balinski & Young)	Difference (Census- Apportionment)	
#	Year			Amount	% of Census
1	1790	3,513,183	3,393,236	119,947	3.4%
2	1800	5,010,172	4,889,823	120,349	2.4%
3	1810	6,710,919	6,584,255	126,664	1.9%
4	1820	9,090,219	8,609,047	481,172	5.3%
5	1830	12,556,760	11,931,000	625,760	5.0%
6	1840	16,676,537	15,908,376	768,161	4.6%
7	1850	22,652,981	21,675,083	977,898	4.3%
8	1860	30,664,152	29,442,822	1,221,330	4.0%
9	1870	38,115,641	38,115,641	0	0.0%
10	1880	49,371,340	49,371,340	0	0.0%
11	1890	61,848,258	61,763,816	84,442	0.1%
12	1900	74,607,225	74,562,608	44,617	0.1%
13	1910	91,109,542	91,072,117	37,425	0.0%
14	1920	105,273,049	105,210,729	62,320	0.1%
15	1930	122,288,177	122,093,455	194,722	0.2%
16	1940	131,006,184	131,006,184	0	0.0%
17	1950	149,895,183	149,895,183	0	0.0%
18	1960	178,559,219	178,559,219	0	0.0%
19	1970	202,545,363	204,053,325	-1,507,962	-0.7%
20	1980	225,903,767	225,867,174	36,593	0.0%
21	1990	248,102,973	249,022,783	-919,810	-0.4%
22	2000	280,849,847	281,424,177	-574,330	-0.2%

The “Census Population” is the basis for this report. The “Apportionment Population” (or “Representative Population”) data is provided by Balinski and Young.<sup>3</sup>

---

<sup>3</sup> Balinski, Michel L., H. Peyton Young. *Fair Representation* (second edition). Washington, D.C., Brookings Institution Press. 2001. Appendix B. The Balinski & Young data can also be downloaded from <http://www.uwm.edu/~margo/apport/datasets.htm>

Why does the apportionment population not always equal the census? During the nation's early history, the *apportionment population* was less than the *census* due to a then Constitutionally-mandated formulation which abated, for apportionment purposes, the census totals for specific segments of the population.<sup>4</sup> This inequitable formulation was finally eliminated with the ratification of the 14<sup>th</sup> Amendment in 1868. As a result, the apportionment population equaled the population census in 1870 for the first time.

In recent decades, the apportionment population has sometimes been *greater than* the census due to the number of citizens living abroad (many of whom are serving in the armed forces).<sup>5</sup>

Having clarified the distinction between apportionment and census population data, it is also worth noting that, as shown in the table above, the differences between the two values are rarely material *after* 1860. Though statistically small, the effect of these differences upon the apportionment of representation (among the states) can be quite significant, especially where the number of Representatives is small relative to the population.

It could be argued that, in order to approximate the constituency population, the *greater of* census or apportionment population be used. However, because the differences are not material, and for the sake of consistency, this report relies only upon the census population data.

---

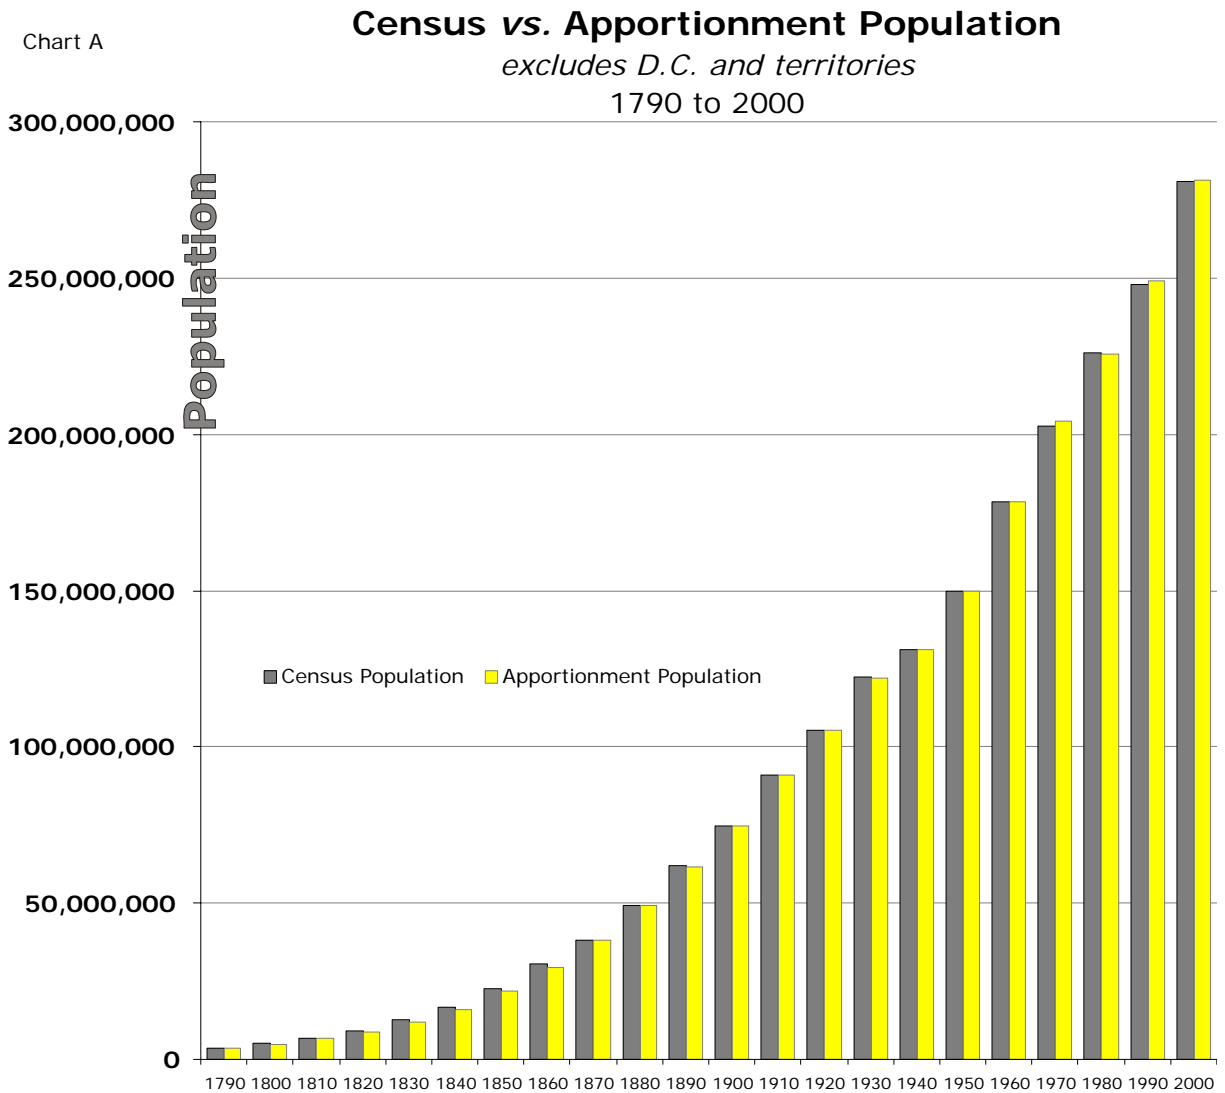

<sup>4</sup> Primarily, the total number of those who were "not free persons" (i.e., those people who were enslaved) was reduced by two-fifths for the purposes of apportioning representation and taxation.

<sup>5</sup> The data also, and unavoidably, include both legal and illegal alien populations.

### 3. GRAPHICAL ILLUSTRATIONS

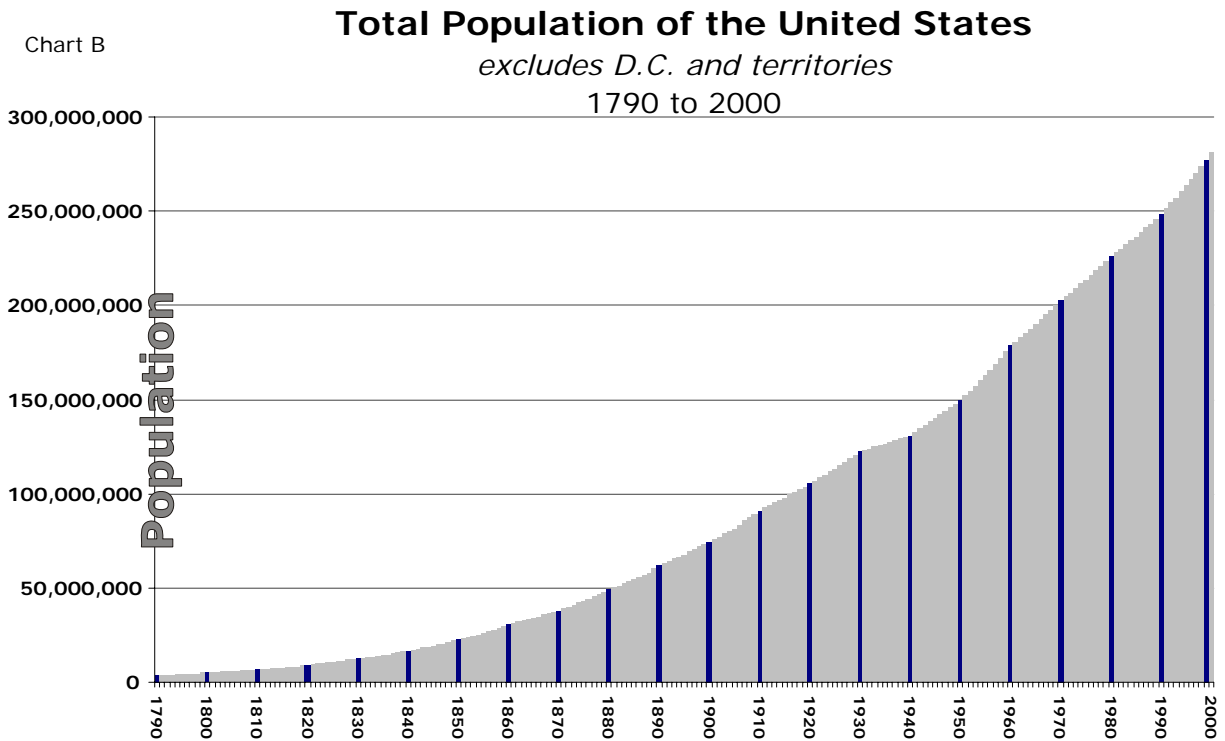

#### 3.1. Census vs. Apportionment Population

The chart below illustrates that the near equivalency of census and apportionment population data, especially beginning with the 1870 census.

### 3.2. Total Population of all States (1790 – 2000)

The chart below illustrates the total census population from 1790 to 2000.

Based on census data, the total population of the United States has increased from 3.58 million in 1790 to over 280 million in 2000 (excluding territories and the District of Columbia).

The data represented by the chart above is provided in Section 4. Appendix 3 provides the historical data *by state*.

**4. HISTORICAL ANNUAL POPULATION (1789 – 2000)**

The annual population totals are summarized below.

<b>Total Population of States</b> (millions)											
Census Decennial		Interpolated Annual Population Levels									
#	Year	'00	'01	'02	'03	'04	'05	'06	'07	'08	'09

22	2000	280.8									

Historical annual population estimates *by state* (1789 – 2000) are provided in Appendix 3.

# Appendices

## Appendix 1 — Interpolation of Decennial Data

---

For the purposes of this analysis, annual population values were interpolated from the USCB’s *decennial* values based on the compounded annual growth rate between two consecutive decennial values. Though the *actual* annual population levels are likely to differ from these interpolated values, TTO believes that the interpolated values provide an adequate proxy for the purposes of conducting historical statistical correlations.

The interdecennial annual values for the *total* U.S. were calculated by totaling the states’ annual values (not by interpolating the total decennial totals). As stated before, these values do not include D.C. or other territories.

The *compounded average growth rate* (CAGR) is found by solving for *r* in this equation:  $Y_{10} = Y_0(1+r)^{10}$  where  $Y_0$  is the population value from one census and  $Y_{10}$  is the population value from the census 10 years later.

### CAGR Example

$Y_{1990} = 6,478,216$  (total GA population in 1990)

$Y_{2000} = 8,186,453$  (total GA population in 2000)

Solving for *r* in this equation:

$$Y_{2000} = Y_{1990}(1+r)^{10}$$

$$8,186,453 = 6,478,216 (1+r)^{10}$$

$$1+r = 1.023679567$$

$$r = .023679567$$

The annual (intercensus) values for each of the years *between* 1990 and 2000 are calculated by factoring with resulting  $1+r$  value (i.e., each year’s value is equal to the preceding year’s value multiplied by 1.023679567). The result is shown in the *example* below:

Year	Decennial Value	Interpolated Values
<b>1990</b>	6,478,216	
<b>1991</b>		6,631,617
<b>1992</b>		6,788,651
<b>1993</b>		6,949,404
<b>1994</b>		7,113,962
<b>1995</b>		7,282,418
<b>1996</b>		7,454,862
<b>1997</b>		7,631,390
<b>1998</b>		7,812,098
<b>1999</b>		7,997,085
<b>2000</b>	8,186,453	

## Appendix 2 — Data Sources

The following notes pertain to the data provided in the population tables in Appendix 3.

**Note 1:** USCB Decennial Census Data

These data are available from several locations at the USCB web site, including: <http://www.census.gov/population/www/censusdata/apportionment.html>.

**Note 2:** Interpolated Annual Values

Annual population values were *interpolated* from the available decennial data (as explained in Appendix 1).

**Note 3:** Non USCB Historical Population Data

The states listed in the table below were admitted *prior* to the initial census for that state. In order to arrive at a pre-census estimate, the following *estimates* were used as a basis for interpolation.

State	Admitted	First Census	Pre-Census Estimates		
			Year	Population	Source
Alaska	Jan. 3, 1959	1860	1950	128,643	From USCB "tab 16"
California	Sept. 9, 1850	1850	1840	10,000	TTO estimate
Connecticut	Jan. 9, 1788	1790	1780	206,701	RMRS (P.47, Table C2) <sup>††</sup>
Delaware	Dec. 7, 1787	1790	1780	45,385	RMRS (P.47, Table C3)*
Georgia	Jan. 2, 1788	1790	1780	56,071	RMRS (P.48, Table C5)*
Hawaii	Aug. 21, 1959	1860	1950	499,794	From USCB "Table 26"
Maryland	Apr. 28, 1788	1790	1780	245,474	RMRS (P.49, Table C10)*
Massachusetts	Feb. 6, 1788	1790	1780	317,760	RMRS (P.50, Table C12)*
New Hampshire	June 21, 1788	1790	1780	87,802	RMRS (P.51, Table C13)*
New Jersey	Dec. 18, 1787	1790	1780	139,627	RMRS (P.51, Table C14)*
New York	July 26, 1788	1790	1780	210,541	RMRS (P.52, Table C15)*
North Carolina	Nov. 21, 1789	1790	1780	270,133	RMRS (P.52, Table C16)*
Pennsylvania	Dec. 12, 1787	1790	1780	327,305	RMRS (P.53, Table C18)*
Rhode Island	May 29, 1790	1790	1780	52,946	RMRS (P.54, Table C19)*
South Carolina	May 23, 1788	1790	1780	180,000	RMRS (P.54, Table C20)*
Texas	Dec. 29, 1845	1850	1840	80,000	TTO estimate
Vermont	Mar. 4, 1791	1790	1780	47,620	RMRS (P.54, Table C21)*
Virginia	June 25, 1788	1790	1780	538,004	RMRS (P.55, Table C22)*

## **Appendix 3 — Historical Annual Population (1789 — 2000)**

---

The tables on the following pages provide the historical annual population estimates — by state and in total — for 1789 to 2000. These data include admitted states only; territories and the District of Columbia are *excluded*.

This population data is provided by calendar year. Also provided, for reference, is the Congress which corresponds to that year.

The explanatory notes referenced in the following tables are provided in Appendix 2.
